

Experience

Researcher with 7+ years of experience bridging analytics and human insight to understand audiences and markets. Experienced in end-to-end research and storytelling that turn data into actionable narratives for strategy, growth, and innovation.

Oliver Wyman

Research Associate

Jan 24 - Current

- **Automated the collection and sentiment analysis of market and user data** for ~20 projects using Python scripts, which improved data velocity for strategic decision-making and saved over 100 hours annually.
- **Led the adoption of GenAI and Machine Learning tools** across 5 core practices to increase department-wide data science productivity by ~15%, focusing on automating tasks relevant to **customer segmentation and forecasting models**.
- **Translated complex quantitative analysis into actionable insights** for over 50 executive presentations, guiding strategic decisions on digital transformation and media, **contributing directly to new business and client growth**.
- **Designed and executed a field research study** on the pricing strategies of 10 key competitors, providing **quantitative market intelligence** that directly enabled the redefinition of a client's pricing strategy.

Researcher

Nov 21 – Dec 23

- Delivered research in diverse fields including **Media, Telecom, and Digital Transformation**, in addition to Finance & Risk (FinTech, Payments, and Blockchain), Energy, and Transportation.
- Built a **Blockchain Tracker** that leveraged data segmentation and time-series modeling principles to **monitor user adoption patterns** across financial technologies, providing insights **into engagement trends and early indicators of churn**.

Citigroup

Corporate Finance Senior Analyst

Feb 20 – Jun 21

- Conducted credit analysis and portfolio management for **SME and MME clients (MXN \$10M+)**, applying quantitative methods to evaluate **risk, identify exposures, and authorize lending decisions**.
- **Modeled client risk exposure** using quantitative analysis and financial forecasting to proactively identify at-risk accounts, **enabling data-driven negotiation strategies** that preserved long-term relationships and maintained portfolio quality during high volatility.
- Collaborated with **international teams** to deliver **risk and portfolio analysis** to committees and clients, clearly communicating findings to both technical and non-technical stakeholders.

Risk Management Analyst

Jun 18 – Jan 20

- Focused on the development of risk analysis with the use of excel models and presentations for clients and risk committees. Conducted forward-looking portfolio analysis, identifying early warning signals and high-risk exposures. Developed cash flow and enterprise valuation models to support lending and risk monitoring.

Skills

Technical & Programming: Python (Pandas, scikit-learn, Surprise), SQL (Advanced), R, Tableau, Data Pipelines, Excel, PowerPoint.

Machine Learning & Analytics: Customer Segmentation (PCA, K-means), Recommender Systems (Collaborative Filtering, SVD), Neural Networks, Supervised & Unsupervised Models, Statistical Analysis (GLMs, Sampling, Time Series), A/B Testing & Experimentation.

Core Skills: Data Visualization, Consumer Insights, Business Storytelling, Communication & Presentation.

Languages: Spanish (Native), English (Fluent), Japanese (Basic).

Education

MIT Professional Education — Applied Data Science Program: Leveraging AI for Effective Decision Making

Mar 25 – Aug 25

Developed capstone projects in **Customer Segmentation** (using PCA, K-means in Python) and **Recommender Systems** (User-User, Item-Item, SVD).

Centro de Capacitación Cinematográfica — Film Editing, Writing Processes, and Audiovisual Narrative

Apr 24 – Jun 24

Explored narrative techniques that complement cinematic language and analyzed the technical and creative processes behind audiovisual storytelling. Developed a strong understanding of **audience behavior and content preferences** within the Mexican entertainment industry.

Instituto Tecnológico Autónomo de México

Jan 13 - Dec 17

B.A. in Economics

Dissertation: Analysis of Bitcoin volatility using ARCH and GARCH models

Approved: June 18
